

REMARKS

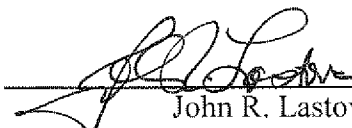

In the final action, the Examiner requests a more detailed title and objects to duplicative wording in claim 46. This amendment provides a new more descriptive title: "Data Processing Apparatus Simulation By Generating Anticipated Timing Information For Bus Data Transfers." Claim 46 is amended to delete "for simulation." Withdrawal of these formal objections is requested.

The substantive rejections will be addressed in a pre-appeal brief. Entry of this amendment after final is respectfully requested and is believed proper in that it simplifies issues for appeal.

Respectfully submitted,

NIXON & VANDERHYE P.C.
